

Name : Baby of Rajitha V.P  
Address : Pulayankud (A), Kadamattam  
Date of Birth : 04-07-19 Ternakulam, Kerala  
Time of Birth : 17:30 hrs.  
Sex : Male / Female ✓  
Delivery : Normal / Vacuum / Forceps / Caesarean ✓  
Birth Weight : 3.233 kg  
Length : 50 cm  
Head Circumference : 34.5 cm  
Blood Group :  
Name of Mother : Rajitha V.P  
Mother's Blood Group :  
Name of Father : Balu P.K.  
Father's Blood Group :  
Remarks :

Name of Doctor : Dr. Madhu George.

Vaccination days : All vaccines except BCG will be given during routine hours (9.00 am - 4.30 pm) on all working days. BCG will be given on all Tuesdays (9.00 am - 4.00 pm).

**Attend pediatric OPD for Immunization**

**PARENTS TO NOTE**

Immunization can be given in the presence of minor illness.

Prior to immunization, inform your doctor if the child has had any significant reactions to the last dose.

**BCG**

A nodule appears 3-4 weeks after BCG Vaccination. It may soften or ulcerate in 2-4 weeks. No application or fomentation is necessary. It heals, leaving a scar, indicating effective vaccination.

**DPT**

There may be mild fever and pain, redness and swelling at the site of injection. A small painless lump may remain for a few weeks. For fever and pain, Paracetamol syrup / tablet may be given. The dose can be repeated for every 4-6 hours if required. Please consult your doctor for any other reactions.

**Measles / MMR**

A few children get fever 4-10 days after the vaccination. Paracetamol tablet may be given if required.

**Optional Vaccination**

Please read your card to know the appropriate age for optional

**Feeding**

Breast milk is the best for your baby. Give it exclusively for the first 6 months. It gives full nutritional requirements for physical and brain growth.

It provides emotional gratification needed for the baby. Infections are less in a breast fed baby.

Start semisolids (Rice, Dhal, Mashed vegetables) from the 6<sup>th</sup> month onwards. Slowly change to solids from the family menu by one year.

Consult your pediatrician, when in doubt.

**Vaccines for High risk Children\***

- 1. Influenza
- 2. Meningococcal Vaccine
