**Following Immunization inform the doctor/nurse if your Child is suffering from:**

- Epileptic fits, seizures or convulsions
- Any untoward reaction from the previous vaccinations
- Severe cough / colds with fever and not feeling well in anyway

**Common Adverse Effects:**  
Pain, Redness, Swelling, Fever

**Homecare Remedies:**  
Give analgesics/antipyretics (Adol) every 6 to 8 hourly as needed. If symptoms persist please see the doctor.

Parents try hard to protect their children throughout their lives. Vaccines are one of the best ways to protect your child.

Your baby should receive the basic series of vaccines from birth up to 12 years of age.
